Skills

HTML/CSS

- Experienced in responsive and adaptive designs.
- Knowledgeable of CSS modules and preprocessors (SASS)

Javascript

- Skilled in JavaScript and DOM
- Used ES6+ syntax for efficient and modern web development

React / Redux

- Experienced in developing various types of applications using React and leveraging a wide range of React libraries.
- Used Redux for state management

GIT

- Experienced in utilizing the Git version control system and GitHub platform

Database

- Relational database modeling, SQL queries, normalization, indexing and query optimization

Deployment

- Developed and deployed applications using Firebase for data storage

Education

Bachelor's Degree in Computer Science

Russian Armenian University
MONTH 2020 - 2024

As a Student I'm learning and developing my skills in different areas of programming:

- First semester at university introduced me to the fundamentals of programming through the C language allowing me to explore core concepts and syntax
- Progressing to C++, where I started to learn more about programming principles, getting to know about Object Oriented Programming (OOP) and learning some simple algorithms

- The next step was to explore data structures, learning about different algorithms and their applications, data structures, binary trees and different methods of data organizing
- Exploring the functional programming paradigms and experience with languages such as Lisp gave me an insight into a different approach to problem solving
- Now, after a short introductory course in Python basics, I've begun to explore the subject of Machine Learning

Languages

Armenian: Native

English: Pre-Intermediate
